With QuoteGiver, you can take control of your information

Solutions Lab QuoteGiver Architecture

QuoteGiver

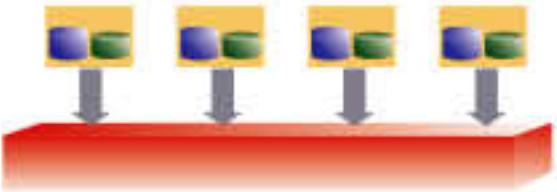

Real time financial information in your control

The most advanced financial information delivery system

BENEFITS OF QUOTEGIVER:

SolutionsLab QuoteGiver Edit | _ | X

Best-of-breed feed providers with lower cost structure

The diagram illustrates a shared infrastructure model. Four server icons, each with a blue and green disk, are positioned above a single, wide red bar. Arrows point from each server icon down to the red bar, indicating that multiple providers are utilizing a common, lower-cost structure.

SolutionsLab QuoteGiver Edit | _ | X

Lower information needs
- Only the necessary information and functions to the right person

The diagram shows a single red bar at the top, with two arrows pointing down from it to two server icons. This represents a streamlined information architecture where only essential data and functions are delivered to the appropriate users.

SolutionsLab QuoteGiver Edit | _ | X

Lower deployment cost via the web browser

The diagram depicts a web-based deployment model. A red bar on the left is connected by an arrow to two browser icons on the right, labeled 'Browsers'. This indicates that the system is deployed and accessed through standard web browsers, reducing deployment costs.

ABOUT SOLUTIONS LAB PTE LTD

SolutionsLab QuoteGiver Edit | _ | X

SOLUTIONS LAB is a software technology and product development company that creates software systems with a wide range of functions and capabilities that meet the requirements of our customers. We are very focused on the Financial Services Industry and possess extensive domain knowledge in this industry.

In addition, the staff at SOLUTIONS LAB is amongst the first in Asia Pacific to specialize in integrating electronic commerce, mobile commerce and voice commerce. Within a short history, the staff at SOLUTIONS LAB has achieved many accolades, amongst them the **"2000 Technology Achievement Award"**. As a result, SOLUTIONS LAB has achieved services and products that are of world-class quality - especially in the areas of e-finance and e-broking.

Our solutions are based on two major technologies, e-commerce engine and an component-based distributed architecture. We developed around these to build a robust engine with fault-tolerance and data integrity. The result is our SOLUTIONS LAB CoreEngine. This system is also being used and implemented in the highly competitive capital markets of Hong Kong and Japan.

Our target customers are blue-chip international, regional and local financial institutions, including banks, securities, securities exchanges, financial portals and other financial service providers.
