Solutions Lab Funds

Solutions Lab Funds is a solution that enables investors to access comprehensive information in the unit trust (mutual) fund industry and make intelligent decisions for transactions using the range of wealth management/financial planning tools available.

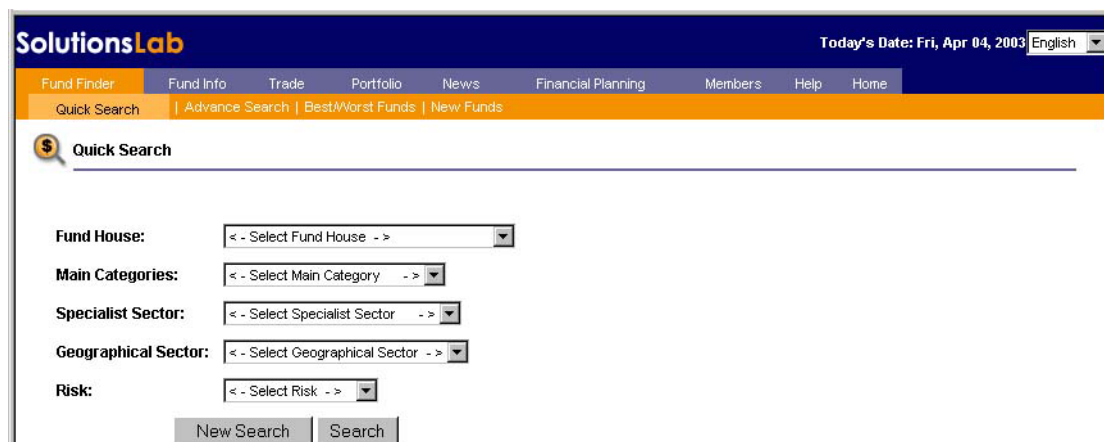

Solutions Lab Funds provides fund prices, specific and detailed fund information and general financial news from a number of feed sources.

Comprehensive search capability, ratings by industry standards and financial planning modules are just some of the essential tools Solutions Lab Funds provides for the investors to make intelligent investment decisions.

System Features

Core features of Solutions Lab Funds:

- Enables quick search on fund information like fund names, fund houses and fund categories and advanced search on detailed information like net asset, star rating, initial load charge, etc. The user is also able to dynamically define the search criteria for each search.

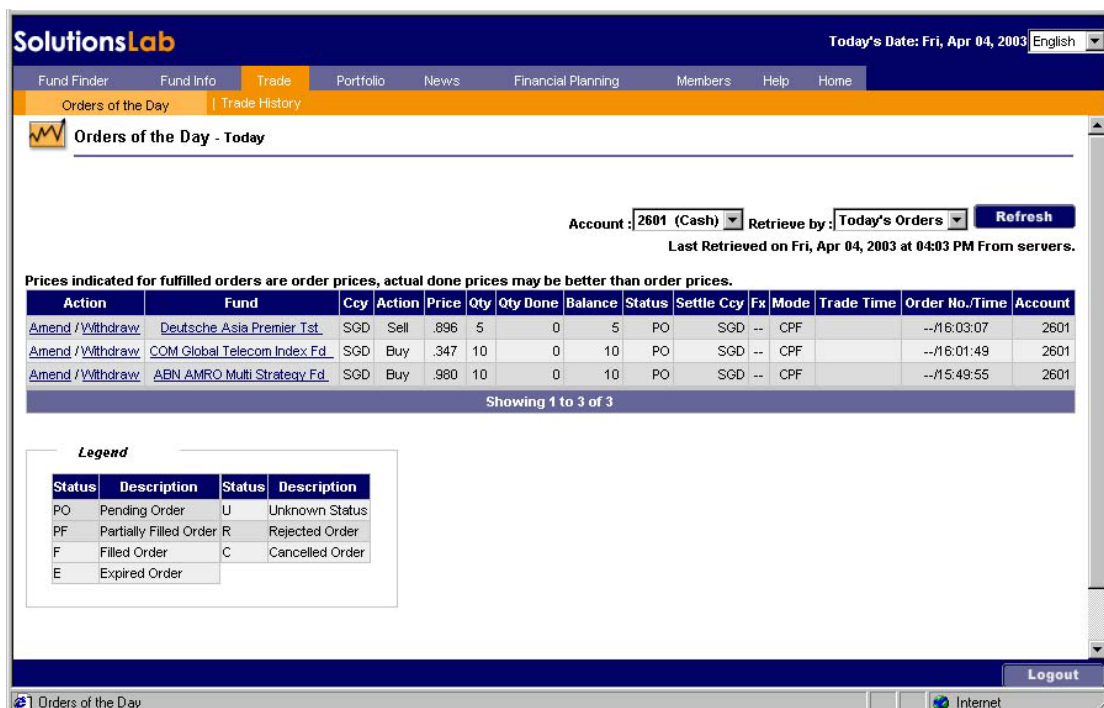

The screenshot displays the 'SolutionsLab' website interface. At the top, there is a navigation bar with 'Fund Finder' highlighted, and other options like 'Fund Info', 'Trade', 'Portfolio', 'News', 'Financial Planning', 'Members', 'Help', and 'Home'. Below this is a secondary navigation bar with 'Quick Search', 'Advance Search', 'Best/Worst Funds', and 'New Funds'. The main content area is titled 'Quick Search' and features a search form with the following fields: 'Fund House' (dropdown menu), 'Main Categories' (dropdown menu), 'Specialist Sector' (dropdown menu), 'Geographical Sector' (dropdown menu), and 'Risk' (dropdown menu). At the bottom of the form are two buttons: 'New Search' and 'Search'.

- Provides detailed fund information categorised on a daily basis. An example of how it could be categorised includes:
 - Fund prices via performance or fund data
 - Best/worst performing funds
 - Best/worst performing sector
- Allows users to view charts and add funds to the watchlists in order to monitor the movement of the individual funds.

- Caters for the buying and selling of unit trust (mutual) fund transactions – specifically the buy (subscription), sell (redemption) and switching of these funds.

- Able to view orders that are submitted today as well as orders that are submitted previously.

- Enables consolidated portfolio. The end users are able to see their consolidated investment holdings of unit trusts on the same portfolio on a marked-to-market basis. In the Solutions Lab Funds portfolio compilation, fund portfolio is displayed in detailed transactions, as well as current portfolio summary, trade history, unsettled contracts and outstanding balance which can be organized by different accounts. The figures are also based on the weighted average pricing of the funds. These functions will enable end users to manage their fund portfolio effectively.

Trade History Internet

- Provides the latest market breaking news and supports in-house news that are distributed internally, to keep the user up-to-date on the latest information.
- Enables financial planning where the user is able to design his portfolio according to his risk profiles. In addition, the user is also able to view the portfolios recommended by their financial planners.
- To help the user keep track of the fund prices and movements, the system makes fund alerts available for:
 - Fund price alerts
 - Transaction alerts

About SOLUTIONS LAB PTE LTD

The staff at SOLUTIONS LAB is amongst the first in Asia Pacific to specialize in integrating electronic commerce, mobile commerce and voice commerce.

As a Company, SOLUTIONS LAB is proud of its technology innovations, and its team of technology experts. Together, the experienced team has achieved services and products that are of world-class quality – especially in the areas of e-business and e-broking. Within a short history, the staff at SOLUTIONS LAB has achieved many accolades, amongst them include the “2000 Technology Achievement Award” given only to 10 companies in Singapore for their commitment to R&D and exploiting technology to enhance business competitiveness.

SOLUTIONS LAB has the knowledge, the expertise and the experience in implementing mission-critical trading systems that spans across the region.

The staff at SOLUTIONS LAB is also one of the first to embark in mobile commerce, where we seek to mobilize e-commerce to help our customers tap on the convenience of mobile technology and the power of e-commerce. Our customers can conduct e-commerce with their customers using mobile technology, like hand phones, pagers, PDAs, and palmtops.

Our solutions are based on two major technologies, e-commerce engine and an component-based distributed architecture. We developed around these to build a robust engine with fault-tolerance and data integrity. The result is our SOLUTIONS LAB CoreEngine. Other applications on the SOLUTIONS LAB CoreEngine include: Funds e-trading, Currency e-trading, Equity e-trading, Wealth Management and Real-time Financial e-platform.
